Song Leading N^o. 1 Why have song leaders? Lara Goudie will begin with this question and build on the answer with practical techniques that will help you be an engaging song leader.

Vocal Technique Build upon the foundations of Song Leading with a workshop on basic vocal technique. Learn to sing longer and stronger, humbly serving God's people with the instrument he has given you.

Bass Come and take a look under the hood at the engine room of the band: the humble bass. Pick up some ideas on how to play bass in a way that drives the band to better things!

Drums On the surface, this workshop appears nothing more than a safe place for drummers. But it's not completely safe! You'll be challenged to play skilfully, thoughtfully and creatively.

Piano How can the piano best serve a music ministry with or without other instruments? No fancy finger-work required for this workshop.

Dressing the Band How do you dress a band? With *Single-Note Instruments*, of course! Flutes, trumpets, saxophones and even violins and guitars all make great attire. Come and learn to dress your band, one note at a time.

Sound Doctrine This practical workshop (in two parts before and after lunch) will look at how to get the best tweak from your sound system.

MMM for Children How can we make our music ministries relevant to our children as well as adults? This workshop will explore some ways to involve children in congregational singing.

Music Ministry for Growing Churches Growing churches are typically stretched for resources. Sometimes buildings are shared with other users, budgets are tight and the team is small. This workshop will explore practical considerations when running music ministry on limited resources and abundant joy!

Song Leading N^o. 2 This workshop will focus on how to introduce songs, and will provide an opportunity to practice your song introductions as well as some of the material from the first session.

Song Selection How do you select songs for a particular theme? What are some of the practical things you need to think about when choosing songs? What tools are there to help? This workshop looks at some principles for selecting songs for Christian meetings.

Band Essentials Learn why playing in a band is like making cheesecake. In this workshop, you'll look at what needs to happen for a band to work well together.

Advanced Band For musicians who are experienced in playing in bands, here's a practical workshop in taking the band further.

Continuing in Sound Doctrine Builds on the workshop in session 1.

Judge Judy Copyright What is CCL? When do you need to worry about copyright and when don't you? Bush lawyers abound on the subject, but in this workshop you can bring all your questions and lay them at the feet of a real lawyer.

Thinking Strategically About Music Got a music ministry to do and a team to lead? Come to this workshop and think through some strategies for making music ministry effective.

COST (includes lunch) \$36
